Software Engineer, Senior Python Developer
12 years of professional experience

In my career, I've advanced from small yet ambitious startups and high-load e-commerce platforms to my current role at a prominent UK fintech company.

With a robust software engineering background and a profound understanding of modern technologies including their practical applications, my extensive skills are well-suited to benefit your business.

It's worth mentioning that at the moment I require support for a Skilled Worker visa to continue working in the UK.

Languages	English (C1), Russian (C2), Ukrainian (C2)
	Python (primarily), JavaScript & TypeScript Familiar with Rust, Go, Clojure and others
Stack	FastAPI, PostgreSQL, Ansible, Docker / Podman, K8s, OSX / Linux / BSD
Pet Projects	Krolib: magic library and DSL to handle complex schedules Snaql: raw *QL queries in Python without pain *...and others*
Talks	API-centric Web Development with Tornado (2015) Search? Sphinx! (2013)

Experience

Feb 2022 — Sep 2022

Revolut (London, GB)
Software Engineer @ Experimentation Platform

Introduced and successfully implemented a comprehensive set of sleek and efficient solutions that formed the foundation of the entire project. Took the necessary leadership and ownership to rapidly adapt the product to constantly changing requirements.

- Python 3, FastAPI, PostgreSQL, Trino, K8s, Pandas, etc.
- Smart home-made libraries to manage growing logic complexity.

Feb 2022 — Sep 2022

Revolut (London, GB)
Software Engineer @ Retail Data Science Team

Was actively involved in the design and development of the Feature Store, successfully implementing several high-level PoCs for our Data Science team.

- Python 3, FastAPI, PostgreSQL, Trino, K8s, Helm, etc.
- Airflow

Dec 2019 — Jan 2022

Revolut (London, GB)
Software Engineer @ Risks Dev Team

Designed and implemented robust solutions for multiple department-level internal projects, while also performing daily maintenance and improvements.

- Python 3, Flask, FastAPI, PostgreSQL, etc.
- React, TypeScript

Fab 2017 — Aug 2019

Nextiva (Kyiv, Ukraine // Scottsdale, USA)
Software Engineer

Rules Engine development.
Designed and developed the Core app, a DSL for describing rule conditions, a handy library to handle complex schedules (published as the company's first open-source project — Krolib), and contributed to the creation of an internal SaaS platform on top of it.

- Python 3, asyncio, aiohttp, RabbitMQ, JSON:API, Protobuf, gRPC, PostgreSQL, etc.

Nov 2015 — Nov 2016

B2B Soft (Kyiv, Ukraine // New York, USA)
Software Engineer, Tech Lead

The brand new medical platform. Design, implementation, release.

- Python 3, Tornado, JSON RPC
- ES6, React/Redux, Webpack (SPA)
- Sphinx Search (live search, geo, delta indexes)
- Real-time billing and stats (Apache Kafka, MongoDB)
- Third-party API integrations (Authorize.Net, Google, Facebook, Mandrill)
- Ansible (IaC), AWS (EC2, RDS, S3, Route53) to rule them all

Mar 2015 — Nov 2015 **SoftServe** (Kyiv & Lviv, Ukraine // San Jose, USA)
Software Engineer

Telemetry aggregation solution for Cisco Cloud Services, BigData extension for OpenStack Horizon.

- Python 2/3, Logstash, MongoDB, RabbitMQ, Puppet
- OpenStack, Flask, Tornado, Ansible
- ES5, Backbone.js, Marionette.js

Fab 2014 — Mar 2015 **Kasta** (Kyiv, Ukraine)
Software Engineer, Head of Platform Development

The brand new e-commerce platform. Design, implementation, MVP.

- Python 3, Tornado, Elasticsearch, ZeroMQ, ZeroC, Protobuf, PostgreSQL
- ES5, Backbone.js, Marionette.js

Aug 2013 — Jan 2014 **GetGoing** (Kyiv, Ukraine // San Francisco, USA)
Software Engineer

Mid-office development, statistical data search and aggregation, PNR Management SPA.
Implemented seat preview and seat selection for the most popular US airlines (backend and frontend, Amadeus GDS integration).

- Python 2/3, Django, PostgreSQL, Celery, Elasticsearch
- ES5, Backbone.js, Marionette.js

Nov 2012 — Aug 2013 **Prom** (Kyiv, Ukraine)
Backend Developer

Company's internal services maintenance, CRM.
Better test coverage, legacy code refactoring, data processing and third-party APIs integration.

- Python 2, Pylons, SQLAlchemy, Celery, Mercurial
